Business and Building Boom *NCCM Fulfills Vision of Technical Expansion*

River Falls, WI: NCCM Company's building expansion began on May 4, 2017 and was completed on August 29, 2017. Located in the Whitetail Ridge Corporate Park, NCCM's continuous success demanded a plant expansion. Since 2009, NCCM has grown to include twenty VARs (value-added resellers) from around the world, and now the River Falls headquarters has grown along with the business.

According to NCCM's builder, the plant expansion added a total of 14,275 square feet to NCCM's headquarters. The original facility, also constructed by Derrick Building Solutions, was highly praised and featured in the "Building Profit" magazine in 2015.

Of the company's building expansion, NCCM CEO and owner Brent Niccum said, "NCCM is a world leader in Roll Technology Solutions, and we are fortunate enough to be able to grow this company and our products. With this new addition, we are able to expand our capabilities as a company all while improving the overall integrity of our product. We are very excited and grateful for this project and everyone who has made this dream become a reality."

In addition to expanding their headquarters, NCCM invested in a plant operation in Montornès, Spain, located 20 miles outside of Barcelona. This new plant currently employs two employees. NCCM expects additional hires and business growth development in 2018.
